Morningstar® Data for Commodities gathers and distributes data feeds from 200+ sources in the power, oil, gas, commodities, equities, futures and weather markets. Sources include all the major exchanges, the electricity system operators (ISOs), price providers, major commodity brokers, weather vendors, and other key data services.

We perform 45+ unique QA checks for each data point, while simultaneously exporting more than 500 million data records, processing 40 million corrections and managing over 5,000 data tickets per month.

Commodity Data Analytical Product Suite utilizes proprietary near-English query language to provide clients with market insights and correlations. Investment professionals and analysts use the research tools to identify opportunities, back-test strategies and forecast the markets.

Commodity Data Access Solutions allow clients to quickly publish and pull data into local systems. The Web Services platform is optimized for large data uploads and provides clients the ability to load custom format data. API offerings include Java, .Net, C/C++ and are used for extraction of forward curves and settlement prices into risk systems.
